Internal and External Door Sets

Doors Cubicles and Boards {Leeds} Ltd.

Complete service from specification to delivery

Selecting the right door to meet your exact specification can be a daunting task, so it's no wonder that more and more architects, specifiers and building contractors, of all sizes, are turning to DCB (Leeds) Ltd to identify the solution and present a clear and simple purchasing decision.

Choosing from hundreds of standard door types with thousands of material combinations together with an almost infinite choice of tailor made products is difficult enough. Add to this the ever increasing raft of complex environmental legislation, building regulations and Health and Safety issues and the whole process can seem a bewildering prospect. That's where DCB come to the rescue.

Our expert team, with over 70 years of combined experience in the selection and purchase of joinery products, will not only save you time, effort and worry but also save you money too. And that's not just because our enormous purchasing power means that we can negotiate very competitive prices but also because we take care of everything from QS to on-site delivery. We also are happy to help at the tendering stage of a project.

Whether you are involved in new build, conversions, restoration or single unit alterations we will ensure that every detail of your door, doorset or window requirements is taken care of to your complete satisfaction. We can also propose styles that will enhance your project, address environmental or planning concerns, conform to building regulations and above all help you to meet your clients total satisfaction.

In this brochure we can only hope to give you a flavour of the hundreds of products available from stock and the extent of the custom made facilities we can provide. Only by talking together can we truly demonstrate the full extent of our service and our total commitment to exceeding your expectations.

Rest assured that your call to DCB will be the most rewarding few minutes you'll spend in your entire project. We're waiting to hear from you.

the range

As previously stated this brochure is not intended to cover our full range or service. With literally thousands of products available to us it would be impossible to show them all, particularly as many would be tailor made to your specific needs. Only by discussing those needs can we produce fully costed recommendations for you.

Naturally our suppliers include the biggest and best manufacturers in the industry along with carefully selected smaller suppliers specialising in tailored solutions.

Using selected hardwoods, softwood, veneered MDF, laminates, steel or aluminium with solid panels, glazed panels, in single door or patio sizes, we will source the ideal products to meet your needs, whether that's one door or one million.

From a single unit for an independent contractor to a completely mixed requirement across a major development, if a standard ex-stock door does not meet those needs then we'll have the perfect solution made to order.

And what's more we'll endeavour to make sure it's there on time, first time, every time.

We'll work with you every step of the way and take care of every detail, to ensure that you deliver complete satisfaction to your clients.

That's why we are proud to have been chosen to supply such prestigious projects as the Imperial War Museum, in Manchester and several Premier and League stadia, as well as:

- **Schools**
- **Office Developments**
- **HM Forces**
- **Nursing Homes**
- **Student Accommodation**
- **Supermarkets**
- **Retail outlets**
- **Hotels**
- **Pubs**
- **Leisure Centres**

OVER 5000 DOOR OPTIONS FROM **DCB**

features

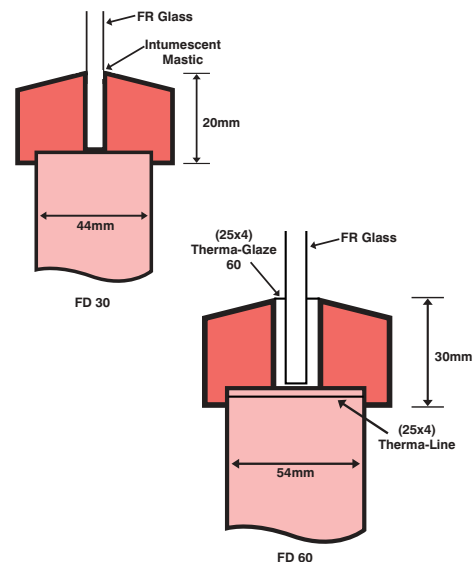

Safety (and security) First

With the astronomical increases in insurance premiums over recent years both in the area of public liability as well as household/office content policies, it is absolutely essential that the doors you fit meet the highest safety and security standards for their purpose.

For your own peace of mind let DCB ensure compliance for you. Our team undergoes continuous training encompassing every aspect of safety and security issues so that you don't have to. We ensure that you get the latest information and best possible advice concerning any changes in UK and European legislation.

We will ensure that the doors you install are fit for purpose thereby eliminating the risk of you inadvertently breaking regulations.

DCB Joinery Ltd.

Certified Aperturing

Aperturing **MUST** be undertaken by qualified approved craftsmen in order to meet legislation. Our in-house aperturing facilities provide vision panels fitted to BWF Certify Standards within time scales that meet the most urgent of needs.

WARNING – Do not put lives at risk through unqualified aperturing

Doors Cubicles and Boards {Leeds} Ltd.

door sets

Specialised Requirements

Working in conjunction with our specialist suppliers we can provide tailor made door sets to meet specific requirements. For example:

- Fire doors upto **FD120** performance
- **Security**
- **Bullet proof**
- **Acoustic**
- **Electrical screening**
- **X-ray protection**

Whatever type of door you require for a specific purpose discuss your requirements with DCB, we are sure to find the perfect solution for you.

Internal and External Door Sets

Where you are experiencing skill shortages or on-site time constraints the answer could be to opt for complete door sets.

We have sourced a comprehensive range that can be ordered from stock or custom made for fast and efficient on site fixing. At DCB we can help you find the solution without compromising quality or design.

panel door
white oak

5
mins

L-shaped brackets enable proper positioning of the doorset unit into the prepared opening and against the plastered wall - fix the brackets into the wall with hand tight screws at this stage.

10
mins

Refit the screw into the lock/latch plate once the retaining bracket is removed. Fix pre-cut doorstops with adhesive. Check that the door opens and closes properly. Tighten all screws.

17
mins

Apply adhesive to the faces of the fixing plates - and to the hidden edge of the grooved lining. 'Pushfit' the architrave to the lining, checking for a good accurate fit.
